Subject of Conversation		Date
		29 July 1963
Person Calling	Office or Company	Telephone Number
Mr. McCamy	National Bureau of Standards	
Information or Action Sought		

## Information Given or Action Taken

A call was made to Mr. C. S. McCamy, National Bureau of Standards and a request made to receive a proposal on the microdensitometer study by end of the week (2 August) or by 5 August (Monday).

Mr. McCamy said that it may not be possible for them to commit sufficient time within the year period proposed for completion of the study to adequately cover all of the subject matter.

Initial contact with Mr. McCamy was on 8 July 1963, at which time a request for a proposal was made. After three weeks it seems that nothing has been accomplished in the way of a proposal but a definite interest was stated in the project as of this date.

A request for inclusion of total cost and subject matter was made and agreed upon by Mr. McCamy.
